

***Every child has a right to health care as per
the UN Convention on the Rights of the Child***

Welcome to the Swedish Child Health Services Barnavårdscentralen BVC

Services at BVC are available to all children aged 0 – 6.

Specialist trained nurses, doctors and psychologists promote your child's health by monitoring health and development, and support you in your role as parent.

You will soon be contacted by the nurse at your local BVC.

If you want to contact BVC prior to that, you can ask for BVC at the health care center – vårdcentralen – closest to you!
