

## CONSENT TO PARTICIPATE IN RESEARCH PROJECT CONNECTED TO THE HEALTH DIALOGUE

I have received oral and written information about the research project *Targeted health dialogues in Skåne: screening of lifestyle habits and analyses of molecular mechanisms for a healthy life*.

I know that information about the research project is available together with the health dialogue questionnaire when I go online to 1177.se. I can also get a paper version at my healthcare centre in connection with the sampling/testing before the health dialogue.

I'm aware that follow-up surveys are included in the research project.

I'm aware that all parts of the research project are voluntary.

I have received information that I can contact researchers at the Center for Primary Health Care Research if I have questions. Contact information can be found in the research information.

I agree to participate in the research project and that data about me is handled in the way described in the research information.

I agree that my samples/tests are stored in a biobank in the way described in the research information.
